

Osman Shaikh

DevOps Engineer | Cloud | Kubernetes | CI/CD | Terraform | AWS | Azure | Automation
Toronto, ON | [+1 \(647\) 709-3449](tel:+16477093449) | usman_s@msn.com | linkedin.com/in/osman-shaikh
Canadian Permanent Resident — Fully eligible to work in Canada (no sponsorship required)

OBJECTIVE

DevOps Engineer with 5+ years of experience designing cloud-native infrastructure and automated CI/CD pipelines across AWS and Azure. Strong background in Kubernetes (EKS/AKS), Terraform, Jenkins, GitHub Actions, GitLab CI/CD, and container-first architectures. Adept at improving deployment velocity, observability, and security through automation and DevSecOps practices (SAST/SCA/DAST). Hands-on experience supporting ML workloads in cloud, including model packaging, training workflow automation, and secure scalable compute deployments. Focused on reliability, cost efficiency, and delivering predictable releases in large-scale environments. Experienced in Agile/Scrum environments and partnering closely with development, security, platform, and data teams to deliver reliable and scalable releases.

CORE SKILLS

- **Cloud:** AWS (EKS, ECS, Lambda, Fargate, VPC, S3, SageMaker) and Azure
- **Containers:** Docker, Kubernetes (EKS/AKS), Helm, Microservices
- **CI/CD:** Jenkins, GitHub Actions, GitLab CI/CD, ArgoCD, Airflow
- **IaC & Automation:** Terraform, Ansible
- **Security / DevSecOps:** Snyk, SonarQube, OWASP ZAP, Trivy, SAST, SCA, DAST, SOC2
- **Monitoring & Observability:** CloudWatch, Prometheus, Grafana, CloudWatch Logs Insights
- **Languages:** Python (Pandas, NumPy, boto3, PySpark), Bash
- **ML/MLOps Support:** MLflow, SageMaker model build/deploy, reproducible pipelines
- **Other Strengths:** Distributed tracing, cost optimization, release management, cross-team collaboration

CERTIFICATIONS

- Microsoft Certified: Azure Administrator – Associate (Valid till 11/2026)
- AWS Certified AI Practitioner – Foundational (Valid till 01/2028)
- AWS Certified DevOps Engineer – Professional (Valid till 12/2027)
- AWS Certified Solutions Architect – Associate (Valid till 12/2027)
- Microsoft Certified Solutions Expert (MCSE) | Server Infrastructure & Messaging

PROFESSIONAL EXPERIENCE

DevSecOps Engineer, QPharma, Inc. (Remote — US HQ, working from Toronto)

Jan 2025 – Present

- Built CI/CD pipelines supporting both applications and ML workloads, automating model packaging, validation, and deployment on AWS EKS and ECS
- Integrated pipelines with SageMaker to automate training and inference workflows, reducing manual ML deployment effort by 60%
- Hardened SDLC by embedding SonarQube, OWASP ZAP, and Snyk scans into pipelines, lowering vulnerability exposure by 50%
- Improved application uptime to 95% by modernizing observability using CloudWatch, Prometheus, and Grafana
- Deployed Infrastructure as Code with Terraform and Ansible, cutting manual configurations by 60% and accelerating provisioning speed
- Reduced AWS infrastructure cost by 30% through workload right-sizing and containerization strategies across ECS/EKS.

Lead DevOps Engineer | Systems Limited/Visionet, (US HQ, working from Lahore)

Jan 2021 – Dec 2024

- Designed enterprise CI/CD pipelines that reduced release cycles from weeks to days with standardized deployment processes
- Collaborated with data science teams to align compute environments with full ML model lifecycle (training → validation → deployment)
- Introduced AI-based anomaly detection into deployment workflows to identify performance regressions earlier and more consistently
- Conducted cloud security assessments and enforced SOC2 compliance across internal and client environments.

EDUCATION

- Postgraduate — Applied A.I. Solutions Development (T431)
George Brown College, Toronto, ON | 2026
- B.Sc. (Honors) — Computer Science
Forman Christian College University, Lahore, PK | 2020

AVAILABILITY

Open to full-time opportunities — onsite (in office), hybrid, or remote within Ontario and Canada-wide.
